Feedback on the delivery of Agile Projects in Tairāwhiti Campus

---

From Noor Alani <NAlani@eit.ac.nz>

Date Fri 9/27/2024 10:33 AM

To Anastasia Mozhaeva <AMozhaeva@eit.ac.nz>

Dear Anastasia,

I recently had the opportunity to work with you and observe your Agile Projects class (ITPM5.240), and I would like to offer my feedback based on the session. Overall, the class showcased several strengths in teaching practices, marking, and student activities. Below are the highlights of these areas:

Teaching Practices
Your teaching methods reflect an excellent balance between theory and practice, which is critical in a subject like Agile Projects. You consistently engage students with real-world examples of agile project management, which helps bridge the gap between conceptual learning and practical application.

Marking and Feedback
Your approach to marking demonstrates a strong alignment with the learning outcomes of the course. Key elements observed include using transparent assessment criteria and students appeared to have a clear understanding of what is expected of them in terms of performance, especially in formative activities and assessments.

Student Activities
The activities you facilitated during the class were well-structured and highly relevant to the Agile framework. Some positive aspects include working on hands-on group work. The collaborative exercises encouraged students to apply Agile principles in a simulated environment, which enhanced their understanding of key concepts like sprints and backlogs.

Thank you for your dedication to teaching at our campus in Tairāwhiti Your commitment to fostering a supportive and challenging learning environment is evident, and I am confident it will contribute to student success in the Agile Projects course.

Please feel free to reach out if you would like to discuss this feedback further.
Cheers,
Noor
